

# Solid Crafts – Care for your basket

Keep your basket away from **direct sunlight**. The colours will fade if exposed to bright sunlight!

Keep your basket **dry**, it is made from natural materials so will deteriorate if it gets wet.

If your basket gets out of shape, you can spray lightly with water and reshape it with your hands, or / and put a pot of a similar shape inside it.

If you use your basket as a plant pot, ensure you keep the basket dry. Line your basket with a thick plastic or use a plastic pot inside your basket.

*Have fun with your basket made by Hadithi – Solid Crafts!*

*Our artisans anyhow had fun weaving your baskets. But of course they are most happy with the better future your basket order will provide them. By earning a fair wage and being empowered, they can take care better for themselves and their families.*

**Let's rise by lifting others!**
